Biometrics authentication for hp MFPs and Digital Senders

If you need to control access to hp Multi Function Printers (MFPs) in your organization, install SecureJet Auth Fingerprint on your hp MFPs. Users will then use their finger to authenticate and get access to the device functions such as email, fax, copy or scan. No more PIN code to remember, no more lost badge!

Top-quality fingerprint recognition

SecureJet Auth Fingerprint is a sophisticated biometrics sensor allowing users to enroll and authenticate on hp LaserJet MFPs using their finger instead of their login and password.

Users enroll using the MFP built-in LDAP, Active Directory or Kerberos network authentication. Up to two fingers can be enrolled per user, and up to 500 users can be enrolled per MFP. SecureJet Auth Fingerprint offers the fastest enrollment and recognition speed at the best recognition rate.

Authenticate for MFP applications

The administrator can define what MFP functions requires authentication. Users show their finger to get access to those functions. Upon recognition of the user, the MFP knows about the user name, login and email address. That information is then used by the MFP application such as email sending (FROM field), copy tracking or secure printing to reclaim the user print jobs.

Usable with all MFP functions

Authentication can apply to fax, email, copy, print jobs, scan to folder, DSS WorkflowTM, hp AutostoreTM SecureJet Secure Mobile Printing and any other MFP function.

Fits any business size

Up to 500 users can be enrolled per MFP, directly on the device.

No management required

Inactive users are deleted automatically and users are notified by email.

Simple to install

SecureJet Auth Fingerprint connects directly inside the MFP and requires no PC or server. It is configured through the printer embedded web page.

System requirements

Supports most hp LaserJet MFPs and Digital Senders devices. Full list at www.jetmobile.com, with device-specific pre-requirements. One EIO card slot and one CF slot must be available inside the device.

Package includes

Auth Fingerprint sensor
Cable routing adhesive brackets
MFP internal cards
Setup guide

Regulation

CE and FCC Certified
WEEE and RoHS compliant

Part number: SJFGP0010
