

# SecureJet™ 5 Auth FP

## PIN codes authentication for hp MFPs and Digital Sender

Users can now authenticate on hp LaserJet MFPs using a simple PIN code entered on the front panel touch screen. Users will then use their PIN code to get access to the device functions such as email, fax, copy, scan or secure mobile printing. No more login/password to type on the MFP front panel!

### Up to 1 million PIN codes

SecureJet Auth-FP is directly running from the MFP front panel touch screen. It does not require any extra hardware, power supply or network plug.

Up to 1 million users/PIN codes can be recognized per MFP. The PIN codes and users list can be securely stored on every MFP hard drive or validated against LDAP or Active Directory upon authentication\*. SecureJet Auth-FP offers the fastest authentication at the best price.

### Authenticate for MFP applications

The administrator can define for what MFP functions users must enter their PIN code to get access. Upon PIN code validation, the MFP knows about the user name, login and email address. That information is then used by the MFP application such as email sending (FROM field), copy tracking or secure printing to reclaim the user print jobs.

### Compatible with printers PIN codes

You have a mix of printers and MFPs? SecureJet Auth-FP is fully compatible with the Auth-PXT module. You can then configure MFPs and printers in one unique operation and end-users have the exact same PIN code on both types of devices to get print jobs.

### Usable with all MFP functions

Authentication can apply to fax, email, copy, print jobs, scan to folder, DSS Workflow™, hp Autostore™, job tracking, secure mobile pull printing\* and many other MFP functions.

### PIN codes generation

SecureJet can extract users list from LDAP and ActiveDirectory, generate random PIN codes and email them to end-users.

### PIN codes range

PIN codes can have any value from 1000 to 999999999.

### Simple to install

Just insert the SecureJet Auth-FP card inside the MFP.

### System requirements

Supports most hp LaserJet MFPs and Digital Senders. Full list at [www.jetmobile.com](http://www.jetmobile.com), with printer-specific pre-requirements.

### Package includes

MFP internal card  
Setup guide

### Regulation

CE and FCC Certified  
WEEE and RoHS compliant
